Hi Dave,

I'd like to use the Aspenline website for my portfolio. May I do so?

Currently the site has assets that belong to Aspenline, including the code for the site, images, and contact information. If it is alright with you, I will copy the site and have a link to the copy placed on the portfolio site when I get it up. If you would like, I could also provide a link to the original site alongside the link to the copy.

The copied site will not be used for anything other than demonstration purposes nor will it be repurposed to host sites for any other businesses. It merely represents a sample of my earliest work that I'd like to preserve.

Thank you!

Yes this is fine

I don't think a link is necessary

Thanks

Dave
